

Dear Friend,

Good news! Thanks to you, we're making real progress on making health care more fair in Missouri.

On Tuesday, April 17, the Missouri Senate voted to advance SB 982, which protects Missouri health care consumers by making insurance companies and health care providers treat you more fairly.

Here's what SB 982 does:

1. Prevents insurance companies from unfairly denying coverage for emergency room visits.
2. Protects you from receiving a surprise bill if you go to an in-network emergency room but are seen by an out-of-network doctor while there.
3. Requires health insurance companies to publish accurate provider directories, so you can actually find a doctor who takes your insurance.

[Click here for more information on SB 982.](#)

The Missouri Senate needs to take one more vote to send SB 982 to the Missouri House of Representatives. Please [contact your state senator](#) and tell him or her to support the bill when it comes up for a final vote.
